

## Code to make a Navigation Bar using an Unordered List:

```
<style>
/* styles for navigation */
#nav {
    font-family: Verdana, sans serif;
    color: #000;
    background-color: white;
    padding: 3px
}
#nav ul {
    list-style-type: none;
    margin: 0;
    padding: 0;
}
#nav ul li {
    font-weight: normal;
    float: left;
}
#nav ul li a {
    display: block;
    width: 125px;
    text-align: center;
    text-decoration: none;
    padding: 10px 10px;
    margin: 5px;
    color: white;
    background-color: #6688FF;
}

</style>
</head>

<body>
<div id="nav">
<ul>
<li><a href="directory path to page">Art</a></li>
<li><a href="assets/page you want to link to.html">Illustrations</a></li>
<li><a href="#">Graphic Design</a></li>
<li><a href="#">About</a></li>
</ul>
</div>

</body>
</html>
See next page...
```

When you have got that working, try adding these:  
*This is from the text book, on pages 351-353 (and there's more, too).*

```
#nav ul a:link {
  color: #fff;
}
#nav ul a:visited {
  color: #fff;
}
#nav ul a:focus {
  color:#FC6
  border-color: #fff;
}
#nav ul a:hover {
  color: #fc6;
  border-color: #fff;
}
#nav ul a:active {
  color:#F00;
}
}
```
